COMMENTS TO AUTHORS

The case describes a rare event which is well documented as to CT and intraoperative images. The article can be accepted even though with low priority.

COMMENTS TO AUTHORS

The case report entitled "gastroduodenal intussusception due to gastric schwannoma treated by Billroth II distal gastrectomy" is interesting and well written. Minor comments 1. In line 1-3 of Case Report, revision as "A 69-year-old man was admitted due to intermittent colicky abdominal pain, nausea, vomiting-----." was suggested. 2. In line 3-4 of Discussion, "gastrointestinal stromal tumor" should be deleted, "GIST" is OK. 3. In the Discussion, I think it is more suitable to describe as "The preoperative diagnosis of gastroduodenal intussusception is not difficult, but imaging modalities such as CT, MRI, EGD and EUS only offer preliminary diagnostic information for the etiology [8]. Schwannomas are easily misdiagnosed and frequently as GIST---".
