COMMENTS TO AUTHORS

Authors was analysed the potential mutable sites of the polycystic liver disease genes in a parentage with PCLD patients. The research and findings are important. It is novel but the manuscript readability is low. Manuscript should be evaluated by native English speakers.

COMMENTS TO AUTHORS

The manuscript entitled the screening analysis of candidate gene mutations in a parentage with polycystic liver disease by song Jin et al., is presenting an interesting case. However there are extensive problems with the language. It should be better presented in order to be accepted for publication in the journal.
