COMMENTS TO AUTHORS

The following comments should be addressed by the authors: 1) Not use acronymus in the ababstract like CDAI, PDAI....but use Crohn's Disease activity index .. 2) Language polishing 3) The limits of this study (small sample size, single centre non randomized study) are reported just in one sentence at the end of the discussion section. We recommend to enhance this part with more than one sentences also indicating future directions or future study to validate these results
