COMMENTS TO AUTHORS

In this study, the authors compared the therapeutic effects and postoperative complication rates in patients with severe prolapsing hemorrhoids treated with TST) and Milligan-Morgan hemorrhoidectomy. 480 patients with severe prolapsing hemorrhoids were included. The study is well designed, and the results are interesting. The results suggest that The therapeutic effects of TST and M-M in the treatment of severe prolapsing hemorrhoids were satisfactory. 1 Some minor language polishing should be corrected. 2 Tables should be re-checked. 3 The references should be updated. 4 Text need some editing.
