## COMMENTS TO AUTHORS

Good study about the effect of pretreatment with bifidobacterium on expression of defensin-5 in endotoxin-induced intestinal injury. After some minor correction of the language, the paper will be more better.

## COMMENTS TO AUTHORS

This is an interesting study about the expression of defensin-5. The manuscript is well written.

## COMMENTS TO AUTHORS

This manuscript is very well written. In this manuscript, the authors investigated the changes of MPO content and defensin-5 expression in endotoxin-induced intestinal injury in rats. And the protective effect of bifidobacterium on endotoxin-induced intestinal injury also be investigated. The design of this study is good, and clear. The results are interesting, and well discussed. 1 Some minor language polishing should be corrected. 2 The References should be checked, and updating.
