COMMENTS TO AUTHORS

In their work, the Authors describe a rare case of intestinal obstruction caused by spontaneous cholesterol crystal embolization (CCE). This rare form of systemic embolism may attract the attention of the readers. The work is well written with a good iconography. Only two observations: 1) if the Authors illustrate Figure 1 (above) and 2, perhaps with arrows, the work would be clearer; 2) regarding the references: please provide the PMID number and the CrossRef DOI? (Digital Object Identifier) name at the end of each reference.
