## COMMENTS TO AUTHORS

The authors reviewed "recent updates of precision therapy for gastric cancer: towards optimal tailored management". This is a current topic of interest, and is summarized right to the point. Minor revision 1. (P12 L11) RILOMET-2 study has been terminated since the result of RILOMET-1 was reported. (according to "ClinicalTrials.gov") 2. (P15L14) Dose "heptatoceullar" mean "hepatocellular" ? 3. (P19L3) "regorefenib" should be replaced as "regorafenib". 4. (P45, Table 1) In the line of PRODIGE17 trial, the unit of 4 mos PFS rate would be % instead of mos. 5. (P45, Table 1) The outcomes had better be lined up in order. Authors report OS, PFS and ORR at first lines but at last ORR, PFS and OS in the same table. 6. (P46, Table 1, Note) leukovorin should be rewritten as leucovorin.

## COMMENTS TO AUTHORS

This article is an interest and a much debated topic. Authors must be complimented for their study. The manuscript is very interesting. Before final acceptance for publication there are a few points that should be implemented in the abstract and introduction sections: ? The aim and the type of the study should be clearly stated
