## COMMENTS TO AUTHORS

This is an interesting and well-written review on the relationship between inflammatory bowel diseases and gastrointestinal cancer. Recommendations: Bacterial genus must be in italic.

## COMMENTS TO AUTHORS

I it a well written review. The authors clearly describe the problems and risks regarding interactions between IBD and cancer and effects during medication and treatment (chemo-, radio-, immuno- and hormonal-therapies) of the diseases.

## COMMENTS TO AUTHORS

The authors have outlined successfully the relationship between IBD and carcinogenesis. They also mentioned carcinogenesis mechanisms in patients with IBD. The unfavorable effect of IBD on the treatment results has been discussed.

## COMMENTS TO AUTHORS

Introduction: need better explanation on what comprises ibd. Ibd and risk of cancer: not clear meaning of first sentence. Need to show a table showing differences between inflammatory conditions and factors that characterize them. (also include reference for each one) explain more on the potential functional role of microbiota an ibd and crc. Page 5: first sentence..." other than crc... " need a smooth transition. Page 6: on skin cancer paragraph: there is not clear take to home message to readers. Last paragraph page 6: .... The cesame... (include number of patients) pge 7 second paragraph: ... In addition.... (include age and other demographics) page 8: ibd risk factors need to discussed thoroughly. Page 9:data from clinical trials for ibd and crc need to be described in general conclusions are weak
