COMMENTS TO AUTHORS

In this manuscript, the authors reported a patient with Peutz-Jeghers syndrome with synchronous rectal cancer who was treated with laparoscopic restorative proctocolectomy with ileal pouch-anal anastomosis. In this report, the authors present a patient with a 20-year history of intermittent bloody stool, mucocutaneous pigmentation and a family history of Peutz-Jeghers syndrome, which together led to a diagnosis of Peutz-Jeghers syndrome. Overall, this case report is very interesting, and worthy to be published. 1 Some minor spelling mistakes should be corrected. Maybe a native English speaker will be helpful. 2 The references seems old, please update the reference list. 3 Figures are good.

COMMENTS TO AUTHORS

Excellent case report, can be accepted after some revision of the English.
