COMMENTS TO AUTHORS

Dear Editor, Word Journal of Gastroenterology 31.03. 2016 Please find below the report for the manuscript titled "Natural regression of fibrosis in chronic hepatitis B: Possible implications in the evaluation of risk of HBV related hepatocellular carcinoma" General suggestions 1- The title of the manuscript is related to fibrosis in chronic HBV. However manuscript includes information and comments regarding HCV. You would change the title or change the content. 2- Table 1 includes the comparison of HBV and HCV that is also incompatible with the title. 3- Figure 1 would be changed with the data covers more information regarding the regression of fibrosis (like the articles in your reference list) 4- The manuscript includes lots of repeated information so should be shortened. 5- Spelling errors should be corrected (for example: makers ?markers). 6- English grammar should be checked carefully.
