COMMENTS TO AUTHORS

This is a review article aimed at discussing the role of Parkinson' disease (PD) in gut dysfunction with all related consequences. The authors highlight also the management of all GI conditions associated to PD. The topic is of interest and the manuscript is very comprehensive and well written. Tables are appropriate and summarize very well the main concepts furnished by this review.

COMMENTS TO AUTHORS

Review of: Name of Journal: World Journal of Gastroenterology Manuscript Type: REVIEW Title: Gut Dysfunction in Parkinson's Disease a) Please change colloquial written expression such as "Till date," to more formal English "Until date,". b) The text has many and diverse typographical issues; e.g. extra blank spaces where no needed. c) Bacterial nomenclature must be written down in italics, and following conventions i. e. "H pylori" actually is "H. pylori". On the other hand, "enterobacteriaceae" is "Enterobacteriaceae". d) Gut is a body organ and on the other hand, a biomarker is a substance than can be objectively measured in association to a certain condition. Authors state in the review "GUT AS A BIOMARKER OF EARLY PARKINSON'S DISEASE" which is in conflict with the current definitions.
