## COMMENTS TO AUTHORS

The manuscript on anorectal emergencies is very interesting and I found that it is a very good review. However, there are a few aspects that need to be addressed before the manuscript may be acceptable. It is not expanded or missing some aspects related to congenital anorectal anomalies and the HIV-related co-virology. Two papers should be investigated deeply by the author(s): 1: Jellali MA, Mekki M, Saad J, Zrig A, Elanes I, Mnari W, Maatouk M, Harzallah W, Toumi S, Krichène I, Salem R, Nouri A, Golli M. Perinatally discovered complete tubular colonic duplication associated with anal atresia. J Pediatr Surg. 2012 Jun;47(6):e19-23. doi: 10.1016/j.jpedsurg.2012.01.082. PubMed PMID: 22703820. 2: Anderson KL, Dean AJ. Foreign bodies in the gastrointestinal tract and anorectal emergencies. Emerg Med Clin North Am. 2011 May;29(2):369-400, ix. doi: 10.1016/j.emc.2011.01.009. Review. PubMed PMID: 21515184.

## COMMENTS TO AUTHORS

Dear author: I have read with interest the manuscript entitled "Anorectal emergencies" This is an interesting topic for the readers of WJG and WJGS. The author described the most common surgical anorectal emergencies. The manuscript is very interesting and can be published after minor revision: The author should address also sexually transmitted disease as anorectal non surgical emergencies and surgical emergencies in the neonate such as imperforated anus. It will be also interesting that the author describe the difference in the surgical techniques between all perianal abscesses. Will he consider the bowel obstruction from a rectal tumor an emergency?

## COMMENTS TO AUTHORS

This is a well written paper on anorectal emergencies. The English language must be reviewed.
