## COMMENTS TO AUTHORS

Interesting manuscript, lots of data analyzed. The only weakness may be the absence of authors personal practice and findings.

## COMMENTS TO AUTHORS

Grillo and co-authors reviewed the body of knowledge concerning HER2 heterogeneity in gastric/gastroesophageal cancers. Their work was specifically focused on aspects related to key methodological issues which should be equally considered in a research setting research and clinical practice. The manuscript is well written, although a language revision from an English mother tongue may further improve the quality of this work.
