## COMMENTS TO AUTHORS

This manuscript deals with an interesting topic, that is clinically relevant given the high prevalence of both psoriasis and viral hepatitis, especially HCV infection. It is well structured, and I only find minor language errors

## COMMENTS TO AUTHORS

The authors have reviewed the treatment and management of psoriasis in clinical scenarios of co-existence with hepatitis B or C infections or carrier states. The manuscript has been well prepared and concise, either dermatologists or hepatologists are potential readers. However, some parts of the manuscript require language polishing (which a native English speaker should revise) and a very long abstract, which require reduction.
