## COMMENTS TO AUTHORS

This article is informative and presented in a systematic way. There are some minor comments that need to be corrected. Further, the role of many leptin polymorphisms, like the LEPR G3057A variant which was shown to be expressed in many NAFLD patients, was not included in this article. Please check the list of abbreviation for its completeness. Eg. JAK-STAT; HFE etc. Correct the Typological errors in page 9 - 'threefold'; 'Overexpression'.
