COMMENTS TO AUTHORS

This is an excellent review for the application of computational methods in studying genetic studies of IBD. I enjoyed reading it and found nothing to be corrected except missing conclusion or summary sentences.

COMMENTS TO AUTHORS

A comprehensive review paper that helps clinicians to understand advanced genetics. Comments;
 1. please add a conclusion, future view chapter at the end 2. authors should add a Table showing the major take home messages in 5-6 bullet points to help easy understanding and digesting the methodology behind advanced genetics
