COMMENTS TO AUTHORS

This is an updated review of an important topic. My only suggestion is to include some Tables or Figures so that the review is more enjoyable.

COMMENTS TO AUTHORS

This was a well written mini-review on the hemostasis in liver transplantation. Only two suggestions; would you mind explain the place and the role of the whole blood transfusion in emergency conditions when the hemostasis and the hemodinamical stability are severely broken down. Secondly, some spelling errors should be corrected.
