COMMENTS TO AUTHORS

In this review the authors discusses the current literature on hepatitis C in non-hepatic solid organ transplant candidates and recipients. The article is perfectly written and gives suufficient data on the topic. I have encountered two minor typing errors: First, in page 5 line 4 and the second in the heading of Table 2 (page 19).

COMMENTS TO AUTHORS

This is a very well-written review on HCV in non-hepatic solid organ transplant candidates and recipients. Some minor comments: In the second paragraph of "Impact of Hepatitis C on Outcomes...", the first frase appears incomplete – please verify. Some typos in the last phrase of this same paragraph. References are missing in table 3 Does Figure 2 consider all non-hepatic SOT or only potential kidney recipients? If for all non-hepatic SOT, consider adding an observation to "Asses for combined liver-kidney transplant", as this recommendation refers only to ESRD. In the section New era of Hepatitis C Treatment – Interferon Free", in the seventh paragraph ("Although there are very limited data..."), the first phrase is very confusing. Please rephrase.

COMMENTS TO AUTHORS

Well done review. Only two queries about Table 1: - SVR in first line is lacking. - Results of reference 58 (Fabrizi et al.) about SVR and adverse event are reported in an unusual and difficult-to-understand way (OR): an explanatory note should be reported
