## COMMENTS TO AUTHORS

I would recommend editage for language correction. Overall, interesting article with good methodology presenting review about most current prospective trials and cohort analyses for treatment of patients with liver cirrhosis and liver graft recipients with Interferon-free treatment.

## COMMENTS TO AUTHORS

This concise review gives us a current perspective of the interferon-free treatment of hepatitis C virus-associated liver cirrhosis and post transplant liver graft infection. Although it is well written, the paragraph construction is a little hard to follow in 'Antiviral therapy in HCV liver graft infection' section. The paragraph titles lack coherence. And the conclusion is lengthy. It would be better to divide into Summary section and a short conclusive comment as Conclusion section.
