COMMENTS TO AUTHORS

In this manuscript, the authors generated a simple non-germline murine ICC model with activated Notch, loss of p53 and IDH1R132C mutant. Which provides a useful tool to further characterize the functional contribution of IDH1R132C mutant in ICC development. The manuscript need to be modified before publication. Comments: 1. There are many spelling and grammar mistakes in the manuscript. It would be better for the author to find a native speaker or professional company to check and approve the manuscript. 2. The loss of p53/IDH1R132C mutant group should be added into experimental groups. 3. The scale length should be added in Figure 4. 4. Some references are too old.
