COMMENTS TO AUTHORS

Interesting study about inferoposterior duodenal approach for laparoscopic pancreaticoduodenectomy. In this study, the advantages of inferoposterior duodenal approach for laparoscopic pancreaticoduodenectomy are investigated. About 36 laparoscopic pancreaticoduodenectomy cases are included in this study. Comments 1 The manuscript is well written, but some minor language polishing should be corrected. 2 A table of the 36 cases' characters can be added. 3 Figures are good. 4 Results are interesting, and well discussed. 5 The references need to be updated.
