COMMENTS TO AUTHORS

This study is very interesting, and it can be accepted for publication after some minor revision of the language.

COMMENTS TO AUTHORS

This study is very interesting. In this study, Nan et al explored the changes of patients with UC towards the endoplasmic reticulum stress through comparing the changes of XBP1s and the expressions of inflammatory cytokines. The results of this study is good. Comments to the authors 1 The manuscript need a major revision. A great deal of language polishing should be revised. The abstract and the main text need to be edited. 2 Tables are confusion, need to be revised. 3 The ref. 8 is in Chinese, please change. 4 Figures are not very clear, please provide more clearer figures for publication.
