COMMENTS TO AUTHORS

The is a review that describes the current literature to evaluate a better understanding for the role of autophagy in the pathogenesis of Intestinal Bowel Diseases (IBD). The manuscript appears currently complete and the writing is very easy to follow the ideas. My suggestion is to accept the manuscript was proposed.

COMMENTS TO AUTHORS

Comments: The short review " The Role of Autophagy in the Pathogenesis of Inflammatory Bowel Disease" nicely covers the autophagy, its process in the cell, different genetic variants involved in the pathogenesis of IBD and therapy of IBD. ? The interaction of different variant with each other can also be included in the manuscript. ? There are many typos in the manuscript, which need to be corrected. ? Check for English editing and proper reference format.
