		<input checked="" type="checkbox"/> No	

COMMENTS TO AUTHORS

I have read with interest this paper about an important and critical topic, but... is it an editorial as indicated or, maybe, you can find a more appropriate definition for it (original report, case series-report with review....)? I think that the data and the results presented in this paper are important. I only suggest to expand the references with not-only Japanese references (here almost all are from Japanese authors) and to make some comparisons with American and European situations at least, since the readers of this prestigious journal are not only Japanese. After a brief part about this kind of comparison, I feel that this paper merit publication.
