## ESPS PEER-REVIEW REPORT

**Name of journal:** World Journal of Gastroenterology

**ESPS manuscript NO:** 29226

**Title:** Expression and role of nuclear receptor coregulators in colon cancer

**Reviewer's code:** 00053419

**Reviewer's country:** Spain

**Science editor:** Yuan Qi

**Date sent for review:** 2016-08-03 14:27

**Date reviewed:** 2016-08-12 18:03

| CLASSIFICATION   | LANGUAGE EVALUATION   | SCIENTIFIC MISCONDUCT                          | CONCLUSION   |
|--|---|--|--|
| <input type="checkbox"/> Grade A: Excellent            | <input type="checkbox"/> Grade A: Priority publishing                 | Google Search:                                 | <input type="checkbox"/> Accept                        |
| <input checked="" type="checkbox"/> Grade B: Very good | <input checked="" type="checkbox"/> Grade B: Minor language polishing | <input type="checkbox"/> The same title        | <input type="checkbox"/> High priority for publication |
| <input type="checkbox"/> Grade C: Good                 |   | <input type="checkbox"/> Duplicate publication |  |
| <input type="checkbox"/> Grade D: Fair                 | <input type="checkbox"/> Grade C: A great deal of language polishing  | <input type="checkbox"/> Plagiarism            | <input type="checkbox"/> Rejection                     |
| <input type="checkbox"/> Grade E: Poor                 | <input type="checkbox"/> Grade D: Rejected                            | <input checked="" type="checkbox"/> No         | <input checked="" type="checkbox"/> Minor revision     |
|  |   | BPG Search:                                    | <input type="checkbox"/> Major revision                |
|  |   | <input type="checkbox"/> The same title        |  |
|  |   | <input type="checkbox"/> Duplicate publication |  |
|  |   | <input type="checkbox"/> Plagiarism            |  |
|  |   | <input checked="" type="checkbox"/> No         |  |

### COMMENTS TO AUTHORS

The authors provide a comprehensive review focused on the implication in colon cancer of mechanisms associated with the regulation of nuclear receptor pathways. Although the tables summarize the main effectors and observations already done relative to their activity, it is also important to provide an overall mechanistic overview integrating the pathways in which these proteins are involved and the main alterations so far reported. In this regard, the inclusion of a schema is recommended. Edit on page 10 "In a study performed on 27 primary colon adenocarcinomas, it has been showed (must be shown)...."
