COMMENTS TO AUTHORS

In this paper the Authors evaluated the efficacy of modified Helicobacter test using a new test meal in Helicobacter pylori positive and negative dyspepsia patients on proton pump inhibitors. The Authors conclude that the new test meal based 13C-UBT is highly accurate in patients on PPIs and can be used in those unable to stop their PPI treatment. Major and minor criticisms can be done: Major criticism: 1) The patient sample treated in this study is small Minor criticism: 1) The Discussion is longer and of not easy lecture
