COMMENTS TO AUTHORS

This is an interesting Case Report of an unusual case. It is well written although the English needs correction in several places For example, in the Case Report on page 3 "performed to release" should read "performed to reduce", and in the Discussion on page 5, line 9 " mucosal odema was" should read " mucocosal edema might be". The Figures are relevant, but the details are not distinct and the final reproductions when printed will need to be made clearer.
