## COMMENTS TO AUTHORS

The paper is well written and succinct. It deals with a commonly encountered finding in HRIEM and its clinical relevance. I congratulate the authors on their work. However, there are a few typographical errors that need to be corrected.

## COMMENTS TO AUTHORS

This is a well written article. It is an interesting topic. High resolution manometry is still evolving and there are various features in it that are not very clear. This article does throw some light into it. I have no further queries with this article.
