COMMENTS TO AUTHORS

1-Abstract should be re-written without abbreviations and should be summarized
2-All of the abbreviations in the main text should be thoroughly explained
3-The cohort is formed of heterogeneous patients and are mostly of malignant patients (19% NET, 32% NEC and 49% MANEC). These groups do not represent a specific progression of unique pathologic process. Heterogeneity of the cohort cases should be mentioned in the discussion section.
4-The references should be revised according to WJG style (details can be found in author guidelines)
5-Figures should be re-checked for resolution and other technical requirements indicated in the WJG website.
