## COMMENTS TO AUTHORS

This is an excellent critical overview, covering relevant publications of the past 4 decades to the topic, putting present knowledge about the role of p-glycoprotein multi drug transporter in IBD in proper perspective as it highlights possible interactions of the transporter with intestinal microbiota, xenobiotics and innate immunity. The statement in the title: more questions than answers is well taken.

## COMMENTS TO AUTHORS

The author reported a very interesting and comprehensive overview of the p-glycoprotein multidrug transporter in inflammatory bowel diseases. He summarized what is known and what we need to know on this topic. The manuscript is clear in structure and easy to follow. As discussed in the editorial, many aspects of p-gp remain unknown, especially for its possible role in-vivo and eventually for clinical practice. To this end, I would suggest the author to add one figure to summarize the "highlighted questions" in a table so the readers will have a more direct overview.

## COMMENTS TO AUTHORS

To: Professor Lian-Sheng Ma Editor board World Journal of Gastroenterology Title: "The p-glycoprotein multidrug transporter in inflammatory bowel diseases: more questions than answers"

Dear Editor, We have read through the manuscript and we think that the paper is good. Nevertheless:

- Please include a representative figure for this paper.
