PEER-REVIEW REPORT

Name of journal: World Journal of Gastroenterology

Manuscript NO: 52491

Title: MiR-301a transcriptionally activated by HIF-2 α promotes hypoxia-induced EMT by targeting TP63 in pancreatic cancer

Reviewer's code: 00068723

Position: Editorial Board

Academic degree: MD, PhD

Professional title: Doctor, Occupational Physician

Reviewer's Country/Territory: Japan

Author's Country/Territory: China

Manuscript submission date: 2019-11-28

Reviewer chosen by: Jin-Lei Wang

Reviewer accepted review: 2020-01-14 06:32

Reviewer performed review: 2020-01-15 05:05

Review time: 22 Hours

SPECIFIC COMMENTS TO AUTHORS

The authors investigated miR-301a in pancreatic cancer cells. They found out it promoted epithelial mesenchymal transition. They also showed that TP63 was the target of miR-301a. The aim was clear, and the results were rationale. Labor spent by the authors should be admirable. Patient recruitment and ethical statements were absent. Methods of in situ hybridization was absent. TP60 was one of the significances of this study. It would be helpful to provide information on TP60 in Introduction. Discussion should be focused on the significance of the study. Figure 7. In situ hybridization. It would be helpful to add arrow or arrowhead to indicate positive signals.
