#### **SPECIFIC COMMENTS TO AUTHORS**

The authors have produced a 'how I do it' manuscript for a mouse orthotropic liver transplant model. This contains some very useful tips that have obviously been learnt over a number of years. This manuscript will be a useful addition to anyone wishing to undertake a mouse model liver transplant and will also make useful reading for those already carrying out this type of research. There are a small number of grammatical/typographical errors but most importantly the figures need to be professionally drawn. In their current format they detract from what is a useful and important manuscript.
