Title. The title reflects the main subject of the manuscript very well. Abstract. The abstract summarized well the work described in the manuscript. Key words. The key words really reflected the focus of the manuscript. Background. The manuscript adequately described the background and significance of the study Discussion. The manuscript interpreted well findings from literature about AI. References. The manuscript cited appropriately the latest, important references in the introduction and discussion sections and author didn't self-cite. Thirteen among them have less than 3 years. Quality of manuscript organization and presentation. The manuscript is well, concisely and coherently organized and the style, language and grammar is accurate. Research methods and reporting. Authors should have prepared their manuscripts according to manuscript type and the appropriate categories, as follows: PRISMA 2009 Checklist - Evidence-Based Medicine, Systematic review, Meta-Analysis: there is no upload. Did the author prepare the manuscript according to the appropriate research methods and reporting? I liked the manuscript, it is a promising subject but I didn't find the uploaded Checklist.
