#### **SPECIFIC COMMENTS TO AUTHORS**

Manuscript title: Textbook Outcomes in Hepatobiliary and Pancreatic Surgery. I appreciate this special topic about an instrument to analyse surgical quality. I think that the author explores with a great analyse all fields concerning the appropriateness and value of objectif index on surgical outcome in HPB surgery. It can be interessant in future to try to extend the analysis to european and asiatic HPB cancer centers in order to standardise the tool. Definitely, I think that this work can be considered for publication.
