#### **SPECIFIC COMMENTS TO AUTHORS**

A brief and well-written report on an important issue. I do not appreciate any major drawback.

#### **SPECIFIC COMMENTS TO AUTHORS**

A very interesting and valuable research which will add to the scientific field, but chronological arrangement of the six included studies is recommended to be changed in all figures and table and in the discussion. Table 1 better to be conducted before figures.

#### **SPECIFIC COMMENTS TO AUTHORS**

Donors for liver transplantation are in short supply all over the world. LDLT is a very good way to supply liver transplantation. Fatty liver patients are not the most suitable liver donor population. But the study found that patients with fatty liver can also become suitable liver donors after losing weight through a variety of regimens. Losing weight can significantly expand the pool of liver donors. This study has great practicability and is recommended to be popularized.
