

PEER-REVIEW REPORT

Name of journal: World Journal of Gastroenterology

Manuscript NO: 64078

Title: Prediction of the severity of colorectal lesion by fecal hemoglobin concentration observed during previous test in the French screening program

Reviewer's code: 05755485

Position: Peer Reviewer

Academic degree: MD

Professional title: Doctor

Reviewer's Country/Territory: China

Author's Country/Territory: France

Manuscript submission date: 2021-02-12

Reviewer chosen by: Ya-Juan Ma

Reviewer accepted review: 2021-03-31 08:33

Reviewer performed review: 2021-04-05 15:33

Review time: 5 Days and 6 Hours

SPECIFIC COMMENTS TO AUTHORS

There are few studies on this, it is a very targeted finding, and through a large number of data analysis of this relationship, it is worth further research and discussion, a very good manuscript. By discussing the relationship between the increase of fecal hemoglobin concentration and the severity of colorectal cancer, and specifically exploring the positive threshold of FHB, it has a great reference for improving the early detection rate of colorectal cancer, and can play the purpose of early detection and early treatment, which is worth our joint discussion and learning.
