statementsConflicts-of-Interest: [☐] Yes [☒] No**SPECIFIC COMMENTS TO AUTHORS**

The manuscript entitled "Pancreatic involvement in celiac disease" is an excellent review of the historical and proposed mechanistic association between celiac disease and various pancreas disorders. The authors put together a great summary of various published work about how celiac patients might be at risk for pancreatic glandular dysfunction and reflect on need to study the potential causative relationship between celiac disease and pancreatitis. Minor note: the authors didn't include author's/title page or an abstract. I encourage the authors to resubmit and adhere to the WJG minireview submission guidelines.
