

## PEER-REVIEW REPORT

**Name of journal:** *World Journal of Gastroenterology*

**Manuscript NO:** 68336

**Title:** Dualistic role of platelets in living donor liver transplantation: Are they harmful?

**Provenance and peer review:** Invited Manuscript; Externally peer reviewed

**Peer-review model:** Single blind

**Reviewer's code:** 05562744

**Position:** Editorial Board

**Academic degree:** FACS, MD, PhD

**Professional title:** Professor, Senior Scientist

**Reviewer's Country/Territory:** Turkey

**Author's Country/Territory:** Japan

**Manuscript submission date:** 2021-05-19

**Reviewer chosen by:** Li Ma

**Reviewer accepted review:** 2021-06-12 03:27

**Reviewer performed review:** 2021-06-13 08:03

**Review time:** 1 Day and 4 Hours

#### **SPECIFIC COMMENTS TO AUTHORS**

Evaluation of the manuscript titled "The dualistic role of platelets in living donor liver transplantation: Are they harmful?" Manuscript No: 68336 Brief: The authors have made a detailed review on the effects of thrombocytes on ischemia and reperfusion injury and liver regeneration in living donor liver transplantation. General evaluation of the sections of the manuscript: Introduction: It is very well written, and it is right to the point. I would suggest adding a few points about the donors as well. Because, in LDLT donors are also at risk of small for size which causes significant morbidity. The manuscript addressed important points in terms of liver regeneration in LDLT. I generally found the manuscript very satisfying I believe it will have a significant contribution to the literature.
