SPECIFIC COMMENTS TO AUTHORS

The authors wrote in details about portal hypertension and prophylactic beta blockers although these medications have no role to prevent decompensation directly, these should summarized and written in concise way The authors neglected drugs like anti-viral drugs that have potent direct and critical role in prevention of decompensation and removal of cirrhotic patients from transplant list based on thier efficacy in improving cirrhosis and also corticosteroids and other therapies for autoimmune hepatitis The manuscript is in need for major language edition

SPECIFIC COMMENTS TO AUTHORS

it would be necessary for the authors to add information about the doses of the drugs analyzed in this report, at least the doses used in every RCT. So please add the doses of propranolol, nadolol, or carvedilol used on the different RCTs cited in the bibliography. The same is true for statins,

SPECIFIC COMMENTS TO AUTHORS

In this paper, the authors focused on summarizing the pharmacotherapy for the prevention of decompensation in patients with compensated liver cirrhosis, which provided a direction for the further research of pharmacotherapy in these patients.
