PEER-REVIEW REPORT

Name of journal: World Journal of Gastroenterology

Manuscript NO: 80110

Title: Advancing the precision management of inflammatory bowel disease in the era of

omics approaches and new technology

Provenance and peer review: Invited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 02536349 Position: Editorial Board Academic degree: MD

Professional title: Doctor, Professor

Reviewer's Country/Territory: Turkey

Author's Country/Territory: China

Manuscript submission date: 2022-09-23

Reviewer chosen by: Dong-Mei Wang

Reviewer accepted review: 2022-11-04 16:52

Reviewer performed review: 2022-11-05 12:01

Review time: 19 Hours

SPECIFIC COMMENTS TO AUTHORS

This is the review regarding the management of inflammatory bowel disease (IBD) widely covering the topics for biomarkers, management precision by genetics, proteomics, microbiomics, and application of AI, and disease management during COVID-19 pandemic. Although the text of paper is interesting, no Figure or Table that help readers understand of the contents is provided, regrettably. Attractive Figures and Tables are quite important for the citation of review articles. Please provide some Figures and/or Tables. I wonder the needs of description regarding the management during the COVID-19 pandemic. As COVID-19 pandemic is about to ending and the consideration for COVID-19 pandemic is different among countries, description regarding COVID-19 pandemic may be better to avoid.

SPECIFIC COMMENTS TO AUTHORS

The quantum of information provided in the manuscript entitled "Toward the precision management of inflammatory bowel disease in the era of omics and new technology" is very vast and the authors have tried to focus on nearly every aspect of IBD including the pathogenesis, prognosis, clinical manifestation, response to treatment and management. But in this quest to cover every aspect, the focus of the article has been lost and the write-up fails to provide a clear and concise message for the readers. It remains unclear why the sections on application of Artificial intelligence/machine learning and management of IBD during Covid-19 have been included in this manuscript. Ideally, they may be published separately to maintain the coherence of the present article and relevance to the title. Furthermore, the manuscript needs to be organized better. For example, a category-wise list of biomarkers along with their merits and demerits may be provided in a Tabular form rather than as a text. All -omics should be discussed separately and not clubbed together. There are several grammatical errors in the manuscript, especially related to the 'tense' which needs correction.
