## SPECIFIC COMMENTS TO AUTHORS

Please explain in detail whether acute pancreatitis that develops diabetes is different depending on the etiology (alcoholic, gallstone, hyperlipidemic, etc.). Please indicate the relationship between the site and extent of pancreatic necrosis and the onset of diabetes.

**SPECIFIC COMMENTS TO AUTHORS**

This is a well written review article which show published evidence on the incidence, risk factors, pathophysiology, clinical outcomes, clinical characteristics and preventive and corrective management of PAPD. It provides helpful guide of early detection and treatment to decrease the associated mortality and morbidity. Since the management is not yet standardized, the study- DREAM supported by The National Institute of Diabetes and Digestive and Kidney Diseases may provide more evidence in the future.
