SPECIFIC COMMENTS TO AUTHORS

1. At present, the incidence of inflammatory bowel disease is increasing, but its treatment methods are very limited. This article introduces a new direction of the treatment of inflammatory bowel disease, which is a relatively novel and clinically valuable topic; 2. The title and abstract of the article are closely related to the theme, with concise and clear expression, coherent language, comprehensive analysis points and complete structure of the full text; 3. The article should focus on the relationship between the mechanism of IBD tissue injury and MH induction, but the explanation of this relationship and MH induction is not clear enough.
