SPECIFIC COMMENTS TO AUTHORS

I had reviewd with interest your manuscript titled (Computed tomography-based radiomics to predict Early Recurrence of Hepatocellular Carcinoma Post-Hepatectomy in Patients Background on Cirrhosis) which was well desinged , iam totally respect your limitations of study regarding study nature , number of included patients and single center study the qusion about high recurrance rate which approximate to 53% , if this depend upone presurgical sellected criteria for hepatectomy and the point of early microvascular invasion needs more data analysis
