SPECIFIC COMMENTS TO AUTHORS

This article has described the magnetic compression method for treating rectal stenosis after surgery. The authors stated this is a unique case since this method is usually applied for enterostomy. The authors have described the patient's clinical course well, and they explain how they work. This is an interesting case report; however, this article has some concerns. 1. Title: It should be considered for "after rectal cancer surgery." 2. Abstract: It is fine. 3. Keywords: Presenting a "Case report" is unnecessary. 4. Background: It is fine. 5. Case: The authors must present chemo-radio therapy for this case. 6. Discussion: It is fine. 7. Figures: These are OK.
