PEER-REVIEW REPORT

Name of journal: World Journal of Gastroenterology

Manuscript NO: 88275

Title: Clinical manifestation, lifestyle, and treatment patterns of chronic erosive gastritis:

A multicenter real-world study in China

Provenance and peer review: Unsolicited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 02978155 Position: Peer Reviewer

Academic degree: MD, PhD

Professional title: Assistant Professor, Professor

Reviewer's Country/Territory: Italy

Author's Country/Territory: China

Manuscript submission date: 2023-11-13

Reviewer chosen by: AI Technique

Reviewer accepted review: 2023-11-15 08:41

Reviewer performed review: 2023-11-15 08:49

Review time: 1 Hour

SPECIFIC COMMENTS TO AUTHORS

Clinical manifestation, lifestyle and treatment patterns of chronic erosive gastritis: a multicenter real-world study in China Overall: The manuscript presents a well-conducted, multicenter, real-world study of chronic erosive gastritis (CEG) in China. The study provides valuable insights into the clinical characteristics, lifestyle factors, treatment patterns, and short-term outcomes of CEG in Chinese patients. Strengths: - Large and representative sample size - Multicenter design - Real-world setting - Comprehensive assessment of clinical characteristics, lifestyle factors, treatment patterns, and short-term outcomes Weaknesses: - Lack of long-term follow-up data - Limited information on the impact of Helicobacter pylori infection on treatment outcomes
