#### **SPECIFIC COMMENTS TO AUTHORS**

The proposed review manuscript by Onyishi et al. aimed to evaluate the impact of spiritual beliefs and faith-based interventions on the management of diabetes mellitus. The general conclusion of the authors is that there is a tendency of spiritual beliefs to be linked with the acceptance and management of diabetes conditions, and that faith-based interventions can be useful in diabetes management. This is an interesting, well-organized, structured and written review, in my opinion. I do not have any comments for improvement.

## RE-REVIEW REPORT OF REVISED MANUSCRIPT
