### **SPECIFIC COMMENTS TO AUTHORS**

For my opinion, it's more practical to expand the supply channels of drugs and consider similar low-cost drugs in resource limited settings.

### **SPECIFIC COMMENTS TO AUTHORS**

The authors discussed the access to novel antidiabetic agents in resource limited settings, considered clinicians were best equipped to lead the process of ensure equity of access. However, I think authors need to consider the local health care policy and economic situation, and if the economic situation is not particularly good, it may be more necessary to invest funds in urgent related treatment.
