### COMMENTS TO AUTHORS

This manuscripts reviews the status of diabetes in the Nigerian population. The study emphasizes the changes occurring in the incidence and distribution of the disease in the population and the most commonly used therapeutic approaches available to control the disease progression and its complications. The manuscript is essentially well written (the abstract requires some minor polishing: NCD? please spell out; remove the between by and communicable...; ...funding must be put...).

### COMMENTS TO AUTHORS

In this review type of manuscript, the authors used MEDLINE system and public search engines to search the reference lists of literature on diabetes in Nigeria. Comments The reviewer has some concerns about this manuscript as follows: 1. In the Introduction section, the descriptions of motive and aim for this review were lacking. The motive and aim for a review article are important. 2. The conclusion and suggestion are not clear. The authors should describe more clearly for their conclusion and suggestion. 3. The presentation with figure or table can help to enhance the comprehension for reading. The authors may consider presenting some figures or tables. 4. The format and language editing in this manuscript should be revised.

### COMMENTS TO AUTHORS

The manuscript represents a reliable overview of the condition of diabetes in the Nigerian population. There are several typos and the manuscript needs some language polishing.
