**SPECIFIC COMMENTS TO AUTHORS**

The decision to make a total pancreatectomy is related to the pancreatic atrophy you found at the second operation. Owing to the nature of paraduodenal pancreatitis, the possible complications of of a PD in terms of pancreatic fistula, and an easy control of

diabetes I think it would be better to consider a total pancreatectomy as a primary choice.  
May be this argoument could be more highlighted.

**SPECIFIC COMMENTS TO AUTHORS**

1.The author should use arrows to indicate important structures in every figure. 2.In my opinion, total pancreatectomy should be considerate, This paper does not present enough evidence to prove that total pancreatectomy can also be a good choice if the
