SPECIFIC COMMENTS TO AUTHORS

Thank you very much this interesting manuscript and very successfully managed patient. But I have some suggestions 1.her elevated tumour biomarkers during her physical examination..... you said. Tumor biomarkers can detected with laboratory examinations, not physical examination. 2. Abbreviations should use with its explanation when write in first time. you say ...Here we report a case of primary ES in the jejunum with EWS rearrangement. ... in background. EWS ?? 3. It will be very useful for readers add a operation photo if you have. 4. In discussion section; it was written like a book chapter rather than a case report. You have to discuss information about yours' case in every end of pharagraph. Furthermore, your conclusion section long and very assertive for a case report. Sincerely
